Hi!

I want to express my enthusiasm for the opportunity to be part of your team. In 2021, I completed my Architecture studies, and since then, I have been working in small-scale architecture studios, engaging in residential projects, renovations, and civic buildings, in addition to handling permit processing and other legal and administrative tasks. I also had the chance to work in the industry, handling logistics during the major maintenance of a sulfuric acid plant.

I am in search of new challenges. Throughout my studies, I gained a solid foundation in architectural theory and design principles, both in Chile, where I focused on the project and form, and in Berlin, where I adopted a more technical and factual approach. I have developed diverse projects, explored different scales and honed my skills to create challenging architectural designs, as well as interesting concepts and distinctive images. I am aware of the latest industry technologies and am always ready to experiment and learn.

I don't have a defined professional path; I enjoy exploring, learning, and adapting. My passion for problem solving, teamwork, detail and the constant pursuit of improvement has led me to achieve positive results and receive commendable feedback in all my previous roles. As a skilled professional, I believe that I can make a valuable contribution to your company.

I would love to be considered in your selection process and am available for a meeting where we can discuss how I can contribute to achieving the goals of your company. I am excited about the possibility of getting to know each other better.

Looking forward to hearing from you!

Thank you for the opportunity.

Greetings,

Franz Böhm
